

SIXTO FELICIANO ARREJIN

Full Stack Developer • React | React Native | Node.js | TypeScript

Corrientes, Argentina | arrejinsixto@gmail.com | +54 379 479-7572

Portfolio: sixto-arrejin.vercel.app | GitHub: github.com/SixtoArrejin | LinkedIn: linkedin.com/in/sixto-arrejin

PROFESSIONAL SUMMARY

Information Systems Engineer with 3+ years of experience designing and developing Full Stack solutions. Specialized in the JavaScript/TypeScript ecosystem (React, Next.js, React Native, Node.js), relational databases (PostgreSQL with Prisma), and applying DevOps culture principles. With direct experience leading and collaborating on high-impact projects, launching technological initiatives from conception, and developing mobile applications successfully published on the Google Play Store. Committed to designing efficient, scalable architectures under agile methodologies like Scrum.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, React Native, Expo, Chakra UI, Tailwind CSS, TanStack Query
- **Backend & DB:** Node.js, Express.js, Hono, REST APIs, PostgreSQL, MySQL, Prisma ORM, Supabase, Redis, JWT/OAuth, SQL Server
- **DevOps & Cloud:** Docker, Kubernetes (K3d), GitHub Actions (CI/CD), Azure (ACR/ACI), Render, Expo EAS, Cloudflare Workers, Terraform
- **AI & Automation:** LM APIs (Google Gemini API), LangGraph, AI Agents (Python), n8n
- **Data & Business Intelligence:** Power BI, ETL (SSIS), OLAP Cubes (SSAS), Dimensional Modeling, Pandas, NumPy, Scikit-learn
- **Methodologies & Tools:** Git/GitHub, GitHub Projects, Scrum, Jira, OpenTelemetry, Prometheus, Grafana, Tempo

PROFESSIONAL EXPERIENCE

Lead Full Stack Developer | Datebox

April 2026 - Present | Corrientes / Remote | datebox.com.ar

- **Design and develop**, within a 4-member team, the technical architecture of a mobile platform using React Native + Expo for the frontend and Hono + Cloudflare Workers on a serverless backend, ensuring high performance and low latency.
- **Implement** client-server communication using an API client autogenerated by Orval, accelerating frontend development and ensuring consistent data contracts.
- **Co-develop** the activities and events recommendation engine by integrating Artificial Intelligence agents (Python + LangGraph) to personalize social outings based on group preferences.
- **Configure and maintain** automated deployment pipelines (CI/CD) using GitHub Actions targeting Cloudflare and Expo EAS to continuously deploy testing and production builds.

Full Stack Consultant & Developer | DÚO Propiedades

June 2026 - Present | Pirané, Formosa / Remote | duopropiedades.com.ar

- **Designed and implemented** the unified digital platform (landing page and catalog) using Next.js (React / TS) and Supabase, successfully digitizing the client's property portfolio.
- **Optimized** the system infrastructure by utilizing serverless technologies (Vercel and Supabase), initially eliminating high fixed hosting and maintenance costs for the client.
- **Developed** a secure, interactive web administration panel (CRUD dashboard) to centrally manage properties, client contacts, and appraisal requests.
- **Implemented** the digital appraisal intake flow, enabling requests from the portal to be registered in the admin panel for manual review and subsequent email delivery.

Full Stack Developer | Secretariat of Science and Technology (UTN-FRRe)

April 2023 - April 2026 | Resistencia, Chaco / Hybrid

- **Designed and developed** from end to end the web platform to centralize and unify administrative processes, research project tracking, and technology transfer management for the secretariat.
- **Implemented** responsive and structured web interfaces using React.js and Chakra UI, managing client-side cache and asynchronous state with TanStack Query and real-time form validation with React Hook Form.
- **Developed** a scalable REST API using Node.js, Express.js, and Prisma ORM, modeling and integrating the PostgreSQL relational database using a clean layered architecture.
- **Secured** the application by integrating JWT authentication with Bcrypt encryption, and configured continuous deployment to Render for immediate functional validation by stakeholders.

FEATURED PROJECTS

Elepad – Mobile App for Senior Citizens (Capstone Graduation Project)

March 2025 - March 2026 | [Elepad - Google Play Store](#) | [Project Details](#)

- **Co-created** a mobile app published on the Google Play Store aimed at cognitive stimulation, daily routines, family integration, and elderly well-being, structuring the codebase in a monorepo with Turborepo.
- **Developed** smooth interfaces using React Native + Expo connected to a serverless backend on Cloudflare Workers and persistent storage on Supabase (Auth, DB, Realtime).
- **Integrated** an interactive module for family memory synthesis using the Google Gemini API to generate automated narrative scrapbooks.
- **Configured** CI/CD pipelines using GitHub Actions and Expo EAS, completing 7 successful releases under the Scrum framework.
- **Award-winning project** originating from the winning proposal of the 2024 Latin American Innovation Rally (3rd place, Social Impact category). 5-member team.

Play Finder – Sports Court Management & Booking Platform

March - December 2023 | [Project Details](#)

- **Co-developed** within a 7-member team a responsive web platform for sports complex management and booking, coordinating tasks under agile methodologies (Scrum).
- **Designed and implemented** a layered architecture using TypeScript, React, and Chakra UI on the frontend, and Node.js, Express, and Prisma ORM on the backend.
- **Integrated** secure authentication using JWT and Google OAuth, alongside automated booking confirmations via the SendGrid API.
- **Implemented** layered architecture, authentication (JWT and Google OAuth), and containerized deployment using Docker on Azure.

EDUCATION

B.S. in Information Systems Engineering | *Universidad Tecnológica Nacional (UTN-FRRe)* | March 2021 - March 2026

- **GPA:** 8.55/10 | 2025 Flag Bearer Escort (Academic Honor).

Associate Degree in Information Systems Analysis (ADUSI) | *Universidad Tecnológica Nacional (UTN-FRRe)* | March 2021 - July 2024

HONORS & CERTIFICATIONS

- **3rd Place – Latin American Innovation Rally 2024** (Social Impact Category, Elepad Project) | *October 2024* | [Verify on LinkedIn](#)
- **Scrum Fundamentals Certified (SFC)** – [SCRUMstudy](#) - Accreditation Body for Scrum and Agile | *July 2024*

LANGUAGES

- **Spanish:** Native
- **English:** Intermediate (technical and professional use)
